CAREER OBJECTIVE

CSE undergraduate seeking a Full-Stack Internship to gain hands-on experience in production-level full-stack development. Having independently built and deployed real-world applications, I bring strong problem-solving ability and fast learning to a collaborative team environment. Looking to grow under experienced mentorship while contributing to live projects and exploring modern AI-driven development practices.

TECHNICAL & SOFT SKILLS

Languages: JavaScript (ES6+) | TypeScript | C | C++ | Python

Frontend: React | Next.js | HTML5 | CSS3 | Tailwind CSS | TanStack Query

Backend: Node.js | Express.js | REST APIs | API Integration | Vercel AI SDK | Zod Validation

Database: MongoDB | MongoDB Atlas | Mongoose ODM

Auth & Security: Better Auth | JWT | JWKS | Google OAuth | Stripe API

Tools: Git | GitHub | VS Code | Vercel | Netlify

Soft Skills: Fast Learner | Problem Solving | Communication | Team Collaboration | Adaptability

PROJECTS

1.GreenPulse AI — ESG Carbon Intelligence Platform

[Live Link](#) | [GitHub\(Client\)](#) | [GitHub\(Server\)](#)

Description: An enterprise full-stack platform that automates corporate carbon footprint tracking (Scope 1-3), extracts energy metrics from utility bills via smart OCR, and delivers contextual ESG compliance insights.

Key Features:

- **Multi-Model Agentic AI & Smart OCR Pipeline:** Built an OCR invoice parser with Vercel AI SDK using dynamic fallback routing to guarantee system uptime during high load or quota limits.
- **Contextual ESG Copilot & Anomaly Analytics:** Built a session-aware AI consultant backed by MongoDB history that analyzes system telemetry logs to detect energy spikes and generate automated compliance tags.
- **Type-Safe Gateway & Zod Validation:** Developed a robust Express and TypeScript API gateway featuring dual-layer Zod schema validation, TanStack Query state sync and indexed MongoDB audit logging.

Tech Stack: Next.js | TypeScript | Node.js | Express.js | MongoDB | Vercel AI SDK | Zod | Tailwind CSS

2.AuraNex – Healthcare Management Platform

[Live Link](#) | [GitHub\(Client\)](#) | [GitHub\(Server\)](#)

Description: Developed a full-stack healthcare platform connecting patients, doctors, and admins with secure role-based dashboards, integrated payment processing, and a fully serverless deployment on Vercel.

Key Features:

- **Advanced Doctor Search & Pagination:** Real-time search and filtering by name, specialization and consultation fee with server-side pagination for fast, scalable browsing across large doctor listings.
- **Stripe Payment Integration:** End-to-end appointment payment flow with Stripe checkout, transaction tracking, and payment status synced to appointment records in real time
- **Role-Based Dashboard Architecture:** Three distinct, protected dashboards (Admin, Doctor, Patient) with dedicated backend routes and dynamic analytics for appointments, verifications, and patient records

Tech Stack: Next.js | Tailwind CSS | HeroUI | Node.js | Express.js | MongoDB | Better Auth | JWT | Stripe | Vercel

3.FundVerse — Premium Crowdfunding Platform

[Live Link](#) | [GitHub\(Client\)](#) | [GitHub\(Server\)](#)

Description: A feature-rich crowdfunding portal that enables software and game creators to showcase projects, manage campaign milestones and process secure backer pledges

Key Features:

- **OAuth Merging & Session Management:** Integrated Better Auth with automatic Google OAuth account merging logic, persistent session restoration hooks and role-based route guards.
- **Debounced Search & Zero-CLS UI Engine:** Engineered a multi-vector exploration hub featuring debounced live search, dynamic range sliders and custom skeleton layouts to eliminate Cumulative Layout Shift (CLS).
- **Payment Workflows & Campaign Management:** Built complete backer pledge flows using Stripe Payment Intents, contribution tracking logs and creator dashboards for milestone withdrawals.

Tech Stack: Next.js 16 | React 19 | Tailwind CSS v4 | Node.js | Express.js | MongoDB | Better Auth | Stripe API | Zod

EDUCATION

Rajshahi University of Engineering & Technology (RUET)

B.Sc. in Computer Science & Engineering (2024 – Present)

CGPA: 3.78 / 4.00 (First Year Average)

Relevant Coursework: Structured Programming, Data Structures & Algorithms, Object-Oriented Programming, Discrete Mathematics, Digital Logic Design

EXTRACURRICULAR ACTIVITIES

- **Competitive Programming:** Actively solving problems on Codeforces (max rating: 918) and CodeChef (max rating: 1293) to sharpen DSA and algorithmic problem-solving skills.
- **Cyber Security Fest (RUET) – Volunteer:** Assisted in event organization, participant coordination and workshop support.

LANGUAGES

Bengali: Native | **English:** Professional Working Proficiency
